

Three Card Poker

**Welcome to the game of Three Card Poker,
a new and exciting variation to
the game of poker.**

The game is fast-paced and easy to learn.

Before the first card is dealt, each player must place an ante wager and/or a pair plus wager. The ante wager is a wager against the dealer. The pair plus wager is a wager against a posted scale of payouts. All ante and pair plus wagers must be placed prior to the dealer announcing "no more bets".

Each player and the dealer receive three cards face down. Players then look at their cards and decide whether to fold (forfeit their ante wager), or continue playing by placing a play wager which must be equal in amount to the ante wager.

The dealer must qualify with a queen high or better. If the dealer does not have at least a queen high, the ante wager wins 1 to 1 and the play wager is returned. If the dealer qualifies with queen high or better, and if the player's hand beats the dealer's hand, the play wager wins 1 to 1 and the ante wager pays 1 to 1. In the event of a tie the hand is declared a push and all wagers are returned.

Ante Bonus

When wagering against the dealer the following bonuses will be paid:

Straight.....	1 to 1
Three-of-a-Kind	4 to 1
Straight Flush.....	5 to 1

Pair Plus Payouts

The pair plus wager allows you to wager on the ranked value of your hand as it is dealt. This wager is not in competition with the dealer's hand.

The payouts for the pair plus wager are as follows:

Pair	1 to 1
Flush	3 to 1
Straight	6 to 1
Three-of-a-Kind	30 to 1
Straight Flush.....	40 to 1
